Backend Developer with around 3 years of experience building maintainable and scalable applications using Java, Spring Boot, and MySQL, specializing in REST API development, database query optimization, and production debugging.

Work Experience

Associate Backend Developer — **ScleraVDMS Pvt Ltd.** — **Apr 2024–Present**
Backend Development team — Udupi, India

- Developed and delivered 6+ backend features at Sclera, contributing across the development lifecycle from implementation and testing to production release.
- Contributed to the backend development of the Sclera ITAM Agent, enabling inventory and telemetry collection across 500+ devices, including hardware, network configurations, installed software, system logs, and CVE data.
- Implemented timezone-aware technician availability logic, dynamically determining and updating technicians' availability status based on their configured working hours, respective time zones and the current local time.
- Developed socket-based data synchronization with batch updates between the cloud and VDMS databases, propagating technician profile changes to maintain data consistency across both systems.
- Developed and deployed the Sclera Remote Desktop application using Rust and Claude Code, implementing WebRTC communication, Node.js signaling server, and Cloudflare Realtime TURN for attended & unattended remote access.
- Analyzed and optimized database queries for network deletion APIs handling 1,000+ discovered devices, replacing loop-based deletion with batch deletion and improving query execution plans to reduce API response times.
- Contributed to the development of a master–slave VDMS architecture for centralized network and device management, enabling cross-network remote service access through TCP tunneling.
- Investigated and resolved production bugs using VDMS logs and SQL queries, identifying root causes and implementing fixes to reduce recurring incidents.
- Recognized for development contributions and appointed as POD Lead, leading a team of 3 developers and coordinating feature development and delivery.

Software Developer Intern — **ScleraVDMS Pvt Ltd.** — **Feb 2024–Apr 2024**
Mangalore, India

- Migrated PDF generation from iTextPDF to Apache PDFBox to leverage an open-source alternative, while enhancing PDF and Excel export generation to improve the overall download experience for users.
- Built the backend for To-Do and Shopping Cart web applications using Java, Spring Boot, and MySQL as part of internship assignments, earning a full-time offer based on performance.

Education and Certifications

- **B.Sc. Computer Science,** Canara Engineering College, Mangalore. **2020–2024**
- **PUC (Class XII) PCMC,** Sri Venkataramana PU College, Kundapur. **2018–2019**
- **SSLC (Class X),** Sri Venkataramana English Medium School, Kundapur. **2017–2018**

Technologies and Languages

- Languages: Java, HTML/CSS, JavaScript, SQL
- Backend: Spring Boot, Node.js, REST APIs
- Databases: MySQL, Redis
- Technologies: Git, Linux, Postman, Docker
- AI Tools: Claude Code, Cursor
